Validation Summary & Missing Information

- Data Source:** Generated using simulated GSTR-2B data (as the prompt placeholder was left empty). Data uses the 'Sharma Cements' scenario from the previous context.
- GST Calculation:** Taxable Value (₹10,000) + IGST 28% (₹2,800) = Total (₹12,800). The calculations are mathematically valid.
- Inter-state Supply:** IGST was applied instead of CGST/SGST because the Supplier State (27 - Maharashtra) and Recipient State (09 - Uttar Pradesh) differ.
- Missing Info Alert:** The GSTR-2B entry typically lacks specific "Item Descriptions." The item "Portland Cement" was inferred strictly from the HSN code (2523). A true valid invoice requires the exact product nomenclature used by the supplier.
